# Welcome...

## Wesco Seeds 2017 Catalogue

Dear Sir, Madam

Welcome to the new season with fresh opportunities & new ideas.

While the past season has at times been challenging: you & ourselves have survived and we are pleased to offer you our 2017 catalogue containing the range of seeds that we have in stock, but this in no way reflects all we have to offer. We will be happy to get any seed in that you may require.

Once again we have been shaken here in North Canterbury with the recent earthquakes in Kaikoura and surrounding areas. While our hearts go out to the people of Kaikoura and the struggles they now face, we have been very fortunate to escape any damage here in Rangiora.

Freight companies have been really responsive with the inland route being an extra 220km+, normally about 3 extra hours. In saying this, freight is being delivered on farm in the normal time frames, but it is still advisable to order your seed with a few extra days up your sleeve just in case there are delays beyond our control.

As we write this we are receiving reports that Northland as well as some other parts of New Zealand are suffering the effects of yet another drought. With weather events like this happening around the country on a yearly basis our team are hearing and seeing the different ways farmers are dealing with and meeting the feed demand. Feel free to give us a call to discuss what options you have for sowing pasture or forage crops to meet your demands going forward.

The team at Wesco Seeds is excited to announce that we will be stocking a full range of chemicals at very competitive prices delivered to your door.

We also have a range of liquid fertiliser products to suit your farming needs (a sample of what's on offer is on pages 72 and 73). Next time you place an order, feel free to discuss your on farm chemical needs.

As always we encourage you to get your grass/crops off to a good start. Clean seed beds will help eliminate pest problems, while sowing into a firm seed bed & applying the correct seed treatment will ensure that you don't have any problems in the post germination stage of growth.

Slugs have been wreaking havoc this past spring, so population levels may be higher in the autumn. We have noticed that Cambridge Rolling after sowing is very effective in restricting Slugs & Black Beetle. Sluggoff is still the best slug bait we have found and at 3kgs/hectare and very tolerant to moisture, we find that farmers are now using it regularly. We can supply it in any quantity you need.

A special "thank you" to all customers that continue with our quality products.

Kind regards,

Lionel Larsen  
owner manager

CLASSIC SEED MIXES

# Saxon Ultra-Pak Dairy and Station Mix

- + Ideal for sheep, beef and deer growth and great milk production.
- + Contains Plantain and Chicory which have deep tap roots to help bring up nutrients and minerals from the sub soil assisting in animal health, in addition to the clovers and high sugar grasses for Quality Carbohydrate in stock diet.
- + Produces high levels of trace elements of Calcium, Magnesium, Sodium-Copper and Selenium.
- + Includes Fascinate for high sugar, converts Nitrogen more efficiently from the soil into carbohydrates/sugars.
- + Has excellent fattening capacity and has been known to increase milk production when used regularly.
- + Recommended sowing rate of 32kg per hectare.

THIS MIX CONTAINS:

<b>44%</b> Saxon Perennial Ryegrass	<b>12%</b> Haifa Pinnacle & Huia White Clover		
<b>10%</b> Maximus	<b>10%</b> Bealey		
<b>8%</b> Paeroa Red Clover & Hamua Red Clover	<b>3%</b> Hercules Plantain		
	<b>3%</b> Sargent Chicory		
<b>500kg +</b>	<b>75-500kg</b>	<b>up to 75kg</b>	
<b>UNTREATED</b>	\$9.05	\$9.10	\$10.05

<b>GOLD STRIKE</b>	\$12.05	\$12.10	\$13.05

all prices include freight & exclude gst

# Saxon PPR Dairy Mix

- + Our most popular dairy mix due to increased milk production in all areas of the country.
- + Also recommended for sheep and beef due to its increased fattening capacity.
- + The balance of grasses & clovers in this mix has proven very successful because of excellent bulk of feed and longevity.
- + Strong clover base - total of 20% for extra protein and nitrogen fixation.
- + Includes Fascinate High Sugar Tetraploid Italian for incredible feed with reports of reduced scouring.
- + Recommended sowing rate 30-32 kg per hectare.

THIS MIX CONTAINS:

<b>50%</b> Saxon Perennial Ryegrass	<b>10%</b> Fascinate High Sugar Tetraploid Italian	<b>10%</b> Bealey	
<b>10%</b> Maximus	<b>4%</b> Hamua Red Clover	<b>4%</b> Haifa White Clover

# Chicory King Pak Stock Health Pasture Mix

- + Chicory for stock health and fattening, Clover adding more feed and nitrogen fixing, on an Active long rotation Italian base (3–5 years).
- + Chicory requires early autumn or spring sowing for establishment purposes. First graze when Chicory is 15 to 20cm height so taproot is well established and resists pulling.
- + Can expect production up to 2–5 years depending on seasons grazing management; Chicory can be resown in after 2 years for a pasture boost.
- + Note: Young Chicory seedlings are frost tender if sowing in Autumn.
- + Sowing rate 28kgs per hectare.

THIS MIX CONTAINS:

<b>26%</b> Active Long Rotation Italian	<b>26%</b> Rocket Grass Long Rotation Italian	<b>30%</b> Sargent Chicory
<b>12%</b> Persian Clover	<b>6%</b> Paeroa Red Clover

CLASSIC SEED MIXES

# Milk Maker Blend

- + Good persistence
- + Growing premium feed to produce maximum milk solids
- + Rapid establishment
- + Recommended sowing rate of 30kg per hectare

THIS MIX CONTAINS:

<b>10%</b> Bealey	<b>13%</b> Saxon	<b>13%</b> Shogun
<b>10%</b> Matrix	<b>7%</b> Plantain	<b>10%</b> Chicory
<b>3%</b> Timothy	<b>10%</b> White Clover Tri Blend	<b>7%</b> Red Clover Tri Blend
	<b>7%</b> B.A.P	<b>10%</b> Italian Multi Blend

	500kg +	75-500kg	up to 75kg
<b>UNTREATED</b>	\$11.10	\$11.40	\$11.70
<b>D NASTRIKE</b>	\$12.60	\$12.90	\$13.20
<b>GOLD STRIKE</b>	\$14.10	\$14.40	\$14.70

all prices include freight & exclude gst

# Italian Multiblend Quality Italian Mix

- + Very effective blend of long & short rotation Italians.  
For affordable turbo charged new pasture or rejuvenation.
- + High quality mix that contains Fascinate (High sugar), Active (3-5 years) and Rocket (2-3 years).
- + Trials have found that blending different types of Italian gives an excellent bi-annual yield, and also the mix of Italian varieties gives the best grazing pattern.
- + Great to sow with Forage Rape/Brassicacs.

THIS MIX CONTAINS:

<b>34%</b> Fascinate	<b>33%</b> Active
	<b>33%</b> Rocket

- + Recommended sowing rate  
20kg per hectare for undersowing  
into pasture or 30-34kg per hectare  
for sowing down.

	500kg +	75-500kg	up to 75kg
<b>UNTREATED</b>	\$4.60	\$4.75	\$5.10
<b>D NASTRIKE</b>	\$6.20	\$6.25	\$6.60
<b>GOLD STRIKE</b>	\$7.70	\$7.75	\$8.10

all prices include freight & exclude gst

## Italian Pasture Blend

- + Great producer of quality feed at a price that fits a budget.
- + Excellent value pasture perk-up for a seasonal boost or sowing down after cropping.
- + Blend of Italian varieties including Italians, tried and true Tama and some of the high sugar Fascinate.

+ Suitable for new pasture or oversowing into existing tired pasture. Drill or can be broadcast.

- + Recommended sowing rate:  
32kgs per hectare.  
20kgs per hectare undersowing.  
35kgs per hectare broadcasting.

	500kg +	75-500kg	up to 75kg
UNTREATED	\$3.30	\$3.35	\$4.00
<b>D NASTRIKE</b>	\$4.80	\$4.85	\$5.50
<b>GOLD STRIKE</b>	\$6.30	\$6.35	\$7.00

all prices include freight & exclude gst

## Fascinate/Kingsford Rape HYF Mix

- + 15% Kingsford Rape, 65% Fascinate High Sugar Tetraploid Italian, 20% Rocket Grass.
- + Superb balanced feed, the Fascinate has the ability to convert nitrates to sugars, reducing the effects of higher nitrate levels found in Kingsford Rape.
- + A superb high yield mix combining 2 great producers that stock love to graze on.
- + Recommended sowing rate of 20kg per hectare.
- + Can be sown with Persian Clover.

### CUSTOMER COMMENT:

CLASSIC SEED MIXES

# Camelid Master Plus

Ideal seed mix for Alpaca and Llamas. A blend of high fibre forage species that is created to have more balanced and consistent sugar levels, giving a balance of many varieties helping to create diet variety. Studies have found by eliminating the rye grass and clover you can reduce the probability of volatile behaviour problems and health complications of your Alpacas and Llamas. A little care and time spent nurturing your pasture will add to sward health that will optimise your camelids health and calm behaviour. As Alpaca & Llamas like longer feed pasture management will be the key to success.

+ Recommended sowing rate of 34kg per hectare.

THIS MIX CONTAINS:

18% Brome	18% Tall Fescue	10% Lucerne
9% Cocksfoot	9% Tri Blend Red Clover	9% Tri Blend White Clover
6% Timothy	6% Chicory	3% Phalaris 3% Yarrow
	25kg +	50kg +

<b>D /ASTRIKE</b>	\$14.40	\$14.15
<b>GOLD STRIKE</b>	\$15.90	\$15.65

all prices include freight & exclude gst

# Horse Master Plus

THE PREMIER OF HORSE BLENDS. A BREAKTHROUGH HORSE PASTURE MIX FOR NZ HORSES AND THEIR OWNERS!

A blend of high fibre forage species that is created to have more balanced and consistent sugar levels, giving a balance of many varieties helping to create a more wild horse blend and diet variety. Studies have found by eliminating the rye grass and clover you can reduce the probability of volatile behaviour problems and health complications of your horses.

A little care and time spent nurturing your pasture will add to sward health that will optimise your horses health and calm behaviour.

+ Recommended sowing rate of 40kg per hectare.

THIS MIX CONTAINS:

20% Cocksfoot	15% Tall Fescue
25% Grazing Brome	15% Timothy Perennial Grass
8% Prairie Grass	5% Browntop 5% Creeping Red Fescue
	2% Lotus 5% Fog Grass

<b>GOLD STRIKE</b>	\$10.0	\$10.50	\$11.95

all prices include freight on orders over 25kg & exclude gst

# Seed Treatment For Higher Yields

**PROTECT YOUR SEED INVESTMENT WITH DYNASTRIKE - THE ULTIMATE SEED GERMINATION ACTIVATOR TREATMENT. RECOMMENDED AND ENDORSED BY WESCO CUSTOMERS.**

DynaStrike Seed Activator is designed to help minimise fungi, pests and disease, whilst enhancing plant germination. DynaStrike helps to excite the germination pattern as extra energy is available for the developing plant which promotes higher yields and creates a better growth biosphere.

What makes DynaStrike so unique and effective?

DynaStrike seed is preprogrammed internally, and ready to bolt with minimal moisture! Due to DynaStrike being a liquid it does not need to be dissolved, saving precious moisture and only adds a minimal 1% weight to the seed allowing seed counts per kg to be highly accurate. This also means that it is absorbed rather than an applied coating meaning it does not rub off or clump seeds together - thus reducing drill blockages and ensuring more consistent seed placement; and is safer for the sower as it cannot be inhaled.

Some of our clients have reported that DynaStrike treatment stimulates quick germination and speeds grass/plant establishment up to 30% earlier than with bare seed. This can mean early pasture establishment of up to two weeks.

DynaStrike plays a vital role in rapid seed germination and early plant/root development, we recommended seed treatment DynaStrike for all Pasture mixes, Grasses, Legumes, Brassicas, Herbs and Cereal crops.

**DYNASTRIKE IS EFFECTIVE FOR ALL NZ FARMING AND GROWING CONDITIONS, IDEAL THROUGH AIR SEEDERS, CONVENTIONAL DRILLS AND RIDGERS. EXCLUSIVE TO WESCO SEEDS LTD NZ WIDE.**

## CUSTOMER COMMENTS:

"The swede you sold me only have sown five days and they were already 1/2 an inch through the ground it was unbelievable. I drove past the paddock and said to myself, what on earth is that growing in there? I thought it must have been a bad lot of weeds come up. Very exciting to see it, I had to ring the contractor that drilled it for me, he couldn't believe it either!"

**Dean H. of Te Awamutu**

"Oversowed turnips into rough block on the off chance I might get some growing, the strike was unbelievable. After seeing the results, I wouldn't plant turnips again without DynaStrike."

**Andrew C. of Opotiki**

"Planted it in peaty soil, the seed was through the ground in 4 days where I'd rolled it, it was an inch and a half in one week in drought conditions. Where I didn't roll it, appeared in 8 days. DynaStrike is worth every cent of the \$1.50 it cost me The neighbours have been round for a look!"

**Graham A. of Te Awamutu**

# Perennial Ryegrasses

Quality Grasses selected by Wesco for Perennial Persistence, Production and great nutritional Feed Value. Unique characteristics for various sowing applications including New Pasture, Oversowing or as a strong base component for lasting Custom Blended Pasture Mixes.

### Bealey

Contact Wesco for pricing details

- + Tetraploid.
- + High feed quality.
- + Highly palatable feed.
- + Excellent seasonal growth.
- + NEA2.
- + Recommended sowing rate of 25-30kg per hectare.

### Matrix

Contact Wesco for pricing details

- + Perennial Ryegrass/  
Fescue cross.
- + Rapid establishment.
- + Plus 23 days heading.
- + Recommended sowing rate of 26-30kg per hectare.
- + Good winter production.
- + Late heading.
- + High Endo.

### Trojan

Contact Wesco for pricing details

- + Diploid heading date +16.
- + Good winter and summer growth.
- + NEA2.
- + Recommended sowing rate of 25-30kg per hectare.

### Rohan

Contact Wesco for pricing details

- + Excellent persistence.
- + Easy care pasture.
- + Bred for sheep and beef farming systems.
- + +18 days.
- + Very palatable.
- + Available in NEA2 and low Endophyte.
- + Recommended sowing rate of 25-30kg per hectare.

## PERENNIAL RYEGRASSES

### Shogun

*Contact Wesco for pricing details*

- + Palatable Tetraploid.
- + Exceptional dry matter yield.
- + Fast establishment.
- + Winter growth for winter finishing.
- + Available with NEA Endophyte.
- + +26 days.
- + Recommended sowing rate of 27-32kg per hectare.

### 24 Seven Edge

*Contact Wesco for pricing details*

- + Excellent annual production.
- + Good winter growth.
- + Strong tolerance to insects (black and ASW).
- + Extended feed quality (+24 day heading date).
- + Excellent animal performance and safety.

### 24 Seven Happe

*Contact Wesco for pricing details*

- + Excellent annual production.
- + Good winter growth.
- + Strong tolerance to many insects (e.g. black beetle, porina and ASW).
- + Extended feed quality (+24 day heading date).
- + Excellent animal performance and safety.

### Aberdart

*Contact Wesco for pricing details*

- + Fine leaved and densely tillered with a good root system helping with persistence and drought recovery.
- + Late flowering with +15 days.
- + Nil Entophyte.
- + High sugar /protein ratio.
- + Recommended sowing rate of 25-30kg per hectare.

### Abermagic

*Contact Wesco for pricing details*

- + Persistent Diploid grass that has fine leaves and is densely tillered that has a late flowering date +19 days.
- + Offers good establishment and good Winter early Spring growth.
- + Available in ARI and nil Endophyte.
- + Recommended sowing rate of 25-30kg per hectare.

# Italian Ryegrasses

## Sonik

Contact Wesco for pricing details

- + Italian diploid.
- + 1 year.
- + Persistence in wet areas.
- + Good tillering.
- + Rust resistant.
- + Plus 17 days.
- + Recommended sowing rate of 25–32kg per hectare.

## Sultan

Contact Wesco for pricing details

- + Diploid with a + 15 day heading date.
- + Fast establishing westerwolds annual.
- + Good level of autumn, winter, spring production.
- + Recommended sowing rate of 25–32kg per hectare.

## Tabu

Contact Wesco for pricing details

- + Italian diploid.
- + 2–3 year with mild summers.
- + Good winter and early spring growth.
- + Good year round growth.
- + Recommended sowing rate of 25–32kg per hectare.

## Perun

*Contact Wesco for pricing details*

- + Excellent animal performance.
- + Very palatable.
- + Fast Winter-Spring growth.
- + Improved Summer survival.

Perun is a festulolium - a cross between Italian ryegrass for Winter growth and meadow fescue for improved quality, tolerance to drought and insects and persistence.

The meadow fescue component gives Perun a good balance of total energy, sugars and digestible fibre. It is highly preferred by animals, allowing high energy intake and performance. Perun is ideal as a lamb-finishing pasture, or for high-performance dairy cows.

Perun is very productive, especially over Winter and Spring. It is used as a longer-lived alternative to Italian ryegrass, with similar pasture growth but improved palatability, stock performance and Summer survival.

Perun has performed impressively on wetland dairy farms, as well as inland dryland and high country farms.

## Jata Edge

*Contact Wesco for pricing details*

- + Bred in New Zealand.
- + Fast establishment.
- + Very high yields.
- + Strong Winter and early Spring growth.
- + Highly palatable.

## Hogan Tetraploid Annual Rye Grass

*Contact Wesco for pricing details*

- + Very fast establishment.
- + High DM yield start to finish.
- + High value feed.

COCKSFOOT

# Crown Royal Cocksfoot Hardy Perennial Grass

- + Renowned for its ability to produce feed in drought conditions.
- + More pest tolerant than most grasses.
- + Good roughage for gut scratch factor in ruminants helping to maintain balance in the diet.
- + Very persistent and long lasting in the pasture.

+ Recommended sowing rates:

- 2–3 kgs per hectare (in a mix)
- 5–8 kgs per hectare (on its own)

	up to 50kg	up to 25kg	up to 10kg
<b>UNTREATED</b>	\$7.85	\$8.10	\$8.85
<b>D <del>ASTRIKE</del></b>	\$9.35	\$9.60	\$10.35
<b>GOLD STRIKE</b>	\$10.85	\$11.10	\$11.85

all prices include freight on orders over 25kg & exclude gst

## Vision Cocksfoot

- + Winter active.
- + Renowned for strong growth over all four seasons.
- + Drought tolerant.
- + Great disease resistance.
- + Perfect for adding to a Ryegrass and Clover mix.
- + Recommended sowing rates of
  - 2–3 kgs per hectare (in a mix)
  - 5–8 kgs per hectare (on its own)

<b>UNTREATED</b>	\$9.80
<b>D <del>ASTRIKE</del></b>	\$11.30
<b>GOLD STRIKE</b>	\$12.80

all prices include freight on orders over 25kg & exclude gst

## Porto

Contact Wesco for pricing details

- + Good late Autumn and early Spring growth.
- + Late maturing.
- + Perennial grass.
- + Brilliant productivity in high rainfall zones.
- + Recommended sowing rates of
  - 2–3 kgs per hectare (in a mix)
  - 5–8 kgs per hectare (on its own)

## COCKSFOOT

## Assured

*Contact Wesco for pricing details*

- + A Cocksfoot with good palatability good autumn and early spring growth and excellent persistence.
- + Less clumping than older varieties.
- + Recommended sowing rates:
  - 2–3 kgs per hectare (in a mix)
  - 5–8 kgs per hectare (on its own)

## Safin

*Contact Wesco for pricing details*

- + Super fine leaf Cocksfoot that is Argentine Stem Weevil and Grass Grub tolerant.
- + Has less clumping characteristics.
- + Recommended sowing rates:
  - 2–3 kgs per hectare (in a mix)
  - 5–8 kgs per hectare (on its own)

## Greenly

*Contact Wesco for pricing details*

- + Good upright growth and quick establishing soft upright leaves and less clumping.
- + Performs in tough environments.
- + Recommended sowing rates:
  - 2–5 kgs per hectare (in a mix)
  - 10–16 kgs per hectare (on its own)

TIMOTHY

# Timothy – Perennial Grass

- + Nutrient rich (high in selenium and vitamin E) and high yielding tough perennial - proven over time.
- + Makes wonderful supplements hay and silage.
- + Maintains quality and palatability even when in seed.

+ Not an imported strain; it has been grown and proven in NZ.

+ Recommended sowing rates:

- 1–2 kgs per hectare (in a mix)
- 6–8 kgs per hectare (on its own)

	25kg +	up to 25kg	up to 10kg
UNTREATED	\$8.80	\$8.90	\$9.30
<i>D MASTRIKE</i>	\$10.30	\$10.40	\$10.80
<i>GOLD STRIKE</i>	\$12.80	\$12.90	\$13.30

all prices include freight on orders over 25kg & exclude gst

# Kahu

- + Great for grazing or forage.
- + Palatable due to being grazed short hence hard to recognise in existing pasture till shut up in a paddock for supplements.

+ Generally likes good fertility and moisture.

+ Recommended sowing rates:

- 1–2 kgs per hectare (in a mix)
- 6–8 kgs per hectare (on its own)

	25kg +	up to 25kg	up to 10kg
UNTREATED	\$8.80	\$8.90	\$9.30

OTHER GRASSES

# Prairie Grasses:

## Bareno

Contact Wesco for pricing details

- + Pasture brome suits areas with poor ryegrass persistence.
- + Moderate densely tillered with good palatability.
- + Recommended sowing rates:
  - 6–12 kgs per hectare (in a mix)
  - 20–25 kgs per hectare (on its own)

## Gala

Contact Wesco for pricing details

- + Grazing brome – persistent and palatable small to medium leaf size with prostrate to semi erect growth and densely tillered.
- + Likes to have free draining soil.
- + Recommended sowing rates:
  - 6–12 kgs per hectare (in a mix)
  - 25–30 kgs per hectare (on its own)

## Atom

Contact Wesco for pricing details

- + Prairie grass with large leaf and low tiller density with upright growth increased persistence under grazing.
- + Recommended sowing rates:
  - 6–12 kgs per hectare (in a mix)
  - 25–30 kgs per hectare (on its own)

# Matua Grazing Brome

- + Likes free draining conditions.
- + Drought tolerant.
- + Palatable seed head.
- + Likes ph 5.6 or higher.
- + Erect growth pattern.

+ Sowing rate 28–34 kgs on its own or 6–12 kgs in mixes.

	500kg +	75-500kg	up to 75kg

# Hillary Fescue

- + Grows well in dry conditions.
- + Fine leaf variety.
- + Slower establishment but yields well.
- + Rust resistant.
- + Deep rooting helps survive summer dry.
- + Plant when soil 12° C or warmer.
- + Manage for feed quality not quantity.
- + Grows well in dry areas where rye grass struggles.
- + Complements clover and grazing herbs.
- + Sowing rate 25–35 kgs on its own  
10–20 kgs in mixes

	500kg +	75-500kg	up to 75kg
<b>UNTREATED</b>	<b>\$9.50</b>	<b>\$9.75</b>	<b>\$10.60</b>

OTHER GRASSES

## Easton Max P Fescue

*Contact Wesco for pricing details*

- + Very high summer and autumn production.
- + Low leaf strength giving high animal performance.
- + Tolerant of insects including black beetle and grass grub.
- + Recommended sowing rate of 15-20kg per hectare (in a mix)

## Tower Fescue

*Contact Wesco for pricing details*

- + Palatable and easy to graze.
- + Persistent.
- + Excellent grazing tolerance.
- + Recommended sowing rate of 15-20kg per hectare (in a mix)

## Zodiac Fescue

*Contact Wesco for pricing details*

- + Recommended sowing rate of 15-20kg per hectare (in a mix)

***Other varieties of Fescues available on request***

# JAPANESE MILLET

## The Billion Dollar grass

**CUSTOMER COMMENT:**

*"...am planting 25-30 % of my farm this year (in millet) as last year in the dry I was able to increase production during the drought."*

- + High performance forage.
- + Multiple grazing's or cuts for silage (2-3 cuts) "...best silage I've ever made..."
- + Sowing rate 25-30kgs /Ha sown down or broadcast.
- + Cheap to establish best in cultivated area.
- + Competes with weed, lower growing costs little or no chemicals needed.
- + First cut or grazing approximately 45-60 days.
- + Grows feed for when you need it in summer.
- + Great for milking cows or beef cattle.
- + Minimum soil temperature for sowing is 17 degrees, Ideal temperature is 20 degrees

	500kg plus	75-500kg	up to 75kg
<b>UNTREATED</b>	\$6.10	\$6.20	\$6.40
<b>D <del>Y</del>ASTRIKE</b>	\$7.60	\$7.70	\$7.90
<b>GOLD STRIKE</b>	\$9.10	\$9.20	\$9.40

all prices include freight on orders over 25kg & exclude gst

# Shirohie Millet

## [shi-row-he]

- + Later flowering date than the Japanese Millet.
- + Multiple grazing's or cuts for silage (2-3 cuts).
- + Minimum soil temperature for sowing is 17 degrees. Ideal temperature is 20 degrees.
- + Recommended sowing rate of 25-30kg per hectare.
- + First cut or grazing approximately 45-60 days.
- + Great for milking cows or beef cattle.

	500kg plus	75-500kg	up to 75kg
<b>UNTREATED</b>	\$6.10	\$6.20	\$6.40
<b>D <del>Y</del>ASTRIKE</b>	\$7.60	\$7.70	\$7.90
<b>GOLD STRIKE</b>	\$9.10	\$9.20	\$9.40

all prices include freight on orders over 25kg & exclude gst

OTHER GRASSES

# Hybrid Forage Sorghum

Contact Wesco for pricing details

- + Great for silage.
- + Can be grazed or cut.
- + Recommended sowing rate of 28–35 kgs per hectare.
- + Grows in low rainfall areas.
- + Need reasonable fertile soil.
- + Consistant yielder.
- + Plant when soil temp is 15–16°C and rising.

# Lotus

- + Can tolerate wet acidic (5.5ph ) & infertile soils.
- + Tolerates shade and needle litter.
- + Helps prevent bloat.
- + Reduces the effect of internal parasites in sheep and cattle.
- + Resistant to grass grub and porina.
- + Long establishment period.
- + Don't over graze to less than 7–10 cm.
- + High protein up to 28% in young.
- + Recommended sowing rate in mixes 1–3kgs/ha.

	25kg +	10 – 25kg	up to 10kg
UNTREATED	\$29.50	\$30.50	\$32.50
<i>D /ASTRIKE</i>	\$32.50	\$33.50	\$35.50
<i>GOLD STRIKE</i>	\$34.00	\$35.00	\$37.00

all prices include freight & exclude gst

# Sunflowers

- + Great to plant with maize for extra oil content.
- + Helps lift oil content of maize silage.
- + Healthier coats on animals.
- + High oil content 40–45% by weight.
- + Plant with turnips.
- + Protein of up to 28% with hulls on.
- + Recommended planting rate 4–6kgs per hectare (37000–62000 seeds per hectare).

	25kg +	10 – 25kg	up to 10kg
UNTREATED	\$12.00	\$12.50	\$13.00
<i>D /ASTRIKE</i>	\$15.00	\$15.50	\$16.00
<i>GOLD STRIKE</i>	\$16.50	\$17.00	\$17.50

all prices include freight & exclude gst

# Clovers

The secret to top farm production - providing varieties that each have unique nutritional characteristics, for feed at different stages of the season. Included as components in many of our seed mixes.

TRI-BLEND SERIES

# Tri-Blend Series

Wesco Seeds has developed the 'Tri-Blend Series' of clover blends. These blends help give diversity and strength to the overall sward, when added to mixes. The advantages of inclusion of these blends into a mix are but not limited to:

- + Boost output of milk and meat from forage with clover blends.
- + Improves soil structure and the quality of grazing.
- + Helps to maintain a balanced grass/clover sward.
- + Performs reliably on most soil types and under most management systems.
- + Blends have a recommended sowing rate of
  - 1–4 kgs per hectare (in a mix)
  - 7–10 kgs per hectare (on its own)
- + Other options to add to a blend are: Chicory, Plantain, Italian or Short Rotation Rye Grass, Rape/Forage Brassicas, other Clovers, or you can include in a standard pasture mix.

## Tri-Blend White Clover

	25kg +	10 – 25kg	up to 10kg
<b>UNTREATED</b>	\$11.50	\$11.90	\$12.40
<b>D <del>ASTRIKE</del></b>	\$14.50	\$14.90	\$15.40

all prices include freight & exclude gst

## WHITE CLOVERS

### Haifa

- + Popular in Australia.
- + High level of heat-stress resistance.
- + Medium leaf size.

	25kg +	10 – 25kg	up to 10kg
<b>UNTREATED</b>	\$11.50	\$11.90	\$12.50
<b>D /ASTRIKE</b>	\$14.50	\$14.90	\$15.50
<b>GOLD STRIKE</b>	\$17.00	\$17.40	\$18.00

all prices include freight & exclude gst

### Huia

- + Successful in a wide range of soil fertility situations.
- + Very high Nitrogen fixing.
- + Included in many of our mixes.

	25kg +	10 – 25kg	up to 10kg
<b>UNTREATED</b>	\$8.90	\$9.40	\$10.60
<b>D /ASTRIKE</b>	\$11.90	\$12.40	\$13.60
<b>GOLD STRIKE</b>	\$14.40	\$14.90	\$16.10

all prices include freight & exclude gst

### Hardy

- + Small leaf with medium to high stolon density can be hard grazed and suits all classes of stock.
- + Exceptionally high in nitrogen fixing.

	25kg +	10 – 25kg	up to 10kg
<b>UNTREATED</b>	\$11.25	\$11.50	\$11.90
<b>D /ASTRIKE</b>	\$14.25	\$14.50	\$14.90
<b>GOLD STRIKE</b>	\$16.75	\$17.00	\$17.40

all prices include freight & exclude gst

*Other varieties of Clovers available on request*

WHITE CLOVERS

# Pinnacle

- + Medium to large leaf size.
- + Drought tolerant.
- + High stolon density.

	25kg +	10 – 25kg	up to 10kg
UNTREATED	\$11.50	\$11.90	\$12.50
<b>D MASTRIKE</b>	\$14.50	\$14.90	\$15.50
<b>GOLD STRIKE</b>	\$17.00	\$17.40	\$18.00

all prices include freight & exclude gst

# Weka

- + High yielding.
- + Medium leaf.
- + High stolon density.
- + White clover.
- + Strong spreading habit.

	25kg +	10 – 25kg	up to 10kg
UNTREATED	\$16.50	\$16.75	\$16.95
<b>D MASTRIKE</b>	\$19.50	\$19.75	\$19.95
<b>GOLD STRIKE</b>	\$22.00	\$22.25	\$22.45

all prices include freight & exclude gst

# Demand

- + Medium leaf variety that has a high stolon density.
- + Helping persistence and a good nitrogen fixer.

	25kg +	10 – 25kg	up to 10kg
UNTREATED	\$16.50	\$16.75	\$16.95
<b>D MASTRIKE</b>	\$19.50	\$19.75	\$19.95
<b>GOLD STRIKE</b>	\$22.00	\$22.25	\$22.45

all prices include freight & exclude gst

*Other varieties of Clovers available on request*

## RED CLOVERS

### Hamua

- + Traditional cultivar often known as cow-grass or Broad Red.
- + Early flowering.

	25kg +	10 – 25kg	up to 10kg
UNTREATED	\$9.50	\$9.90	\$10.40
<b>D <del>A</del>STRIKE</b>	\$12.50	\$12.90	\$13.40
<b>GOLD STRIKE</b>	\$15.00	\$15.40	\$15.90

all prices include freight & exclude gst

### Paeroa Red

- + Large leaf size.
- + Popular for hay/silage.
- + Great Producer.
- + Known to last twice as long as Hamua.
- + Excellent feedback from this superior Red Clover.

	25kg +	10 – 25kg	up to 10kg
UNTREATED	\$16.00	\$16.50	\$17.00
<b>D <del>A</del>STRIKE</b>	\$19.00	\$19.50	\$20.00
<b>GOLD STRIKE</b>	\$21.50	\$22.00	\$22.50

all prices include freight & exclude gst

### Montgomery Red

- + Large leaf size.
- + Popular for hay/silage.
- + Late flowering.

	25kg +	10 – 25kg	up to 10kg
UNTREATED	\$12.50	\$13.00	\$13.50
<b>D <del>A</del>STRIKE</b>	\$15.50	\$16.00	\$16.50
<b>GOLD STRIKE</b>	\$18.00	\$18.50	\$19.00

all prices include freight & exclude gst

### Colenso

- + Diploid variety.
- + Good for hay silage and grazing situations.
- + Early to mid-maturity.
- + Yields more than Pawera.

	25kg +	10 – 25kg	up to 10kg
UNTREATED	\$16.00	\$16.50	\$17.00
<b>D <del>A</del>STRIKE</b>	\$19.00	\$19.50	\$20.00
<b>GOLD STRIKE</b>	\$21.50	\$22.00	\$22.50

all prices include freight & exclude gst

### Tuscan

- + Medium leaf size semi prostrate growth Diploid with early flowering best suited for longer grazing round.
- + High summer yield.

	25kg +	10 – 25kg	up to 10kg
UNTREATED	\$17.50	\$17.90	\$18.40
<b>D <del>A</del>STRIKE</b>	\$20.50	\$20.90	\$21.40
<b>GOLD STRIKE</b>	\$23.00	\$23.40	\$23.90

all prices include freight & exclude gst

**Other varieties of Clovers available on request**

OTHER CLOVERS

## Surge Persian Clover

- + Annual.
- + Highly productive legume.
- + Suits moderate to high rainfall.
- + Likes mild winters.
- + Tolerates wet acid soils.

- + Can be sown with Oats/Italian Rye grass for quality silage.
- + Recommended sowing rates 3-6kgs (in a mix) 8-12kgs (on its own)

	25kg +	10 – 25kg	up to 10kg
<b>UNTREATED</b>	\$9.50	\$9.90	\$10.30
<b>D NASTRIKE</b>	\$12.50	\$12.90	\$13.30
<b>GOLD STRIKE</b>	\$15.00	\$15.40	\$15.80

all prices include freight & exclude gst

## Sub Clover

- + Annual (Autumn, Winter, Spring).
- + Regenerates after Autumn rain.
- + Try and let seed in the first year.
- + Recommended sowing rate in mix 4–6 kgs per hectare.
- + Great legume for dry areas.

- + Good winter production and prolific seeder.

	25kg +	10 – 25kg	up to 10kg
<b>UNTREATED</b>	\$9.20	\$9.70	\$10.20
<b>D NASTRIKE</b>	\$12.20	\$12.70	\$13.20
<b>GOLD STRIKE</b>	\$14.70	\$15.20	\$15.70

all prices include freight & exclude gst

## Arrowleaf Clover

- + High performance annual clover great production.
- + Hard seed that will regenerate if allowed to seed.
- + Productive and able to perform in soils 5–7 ph. range.
- + Annual clover.

	25kg +	10 – 25kg	up to 10kg
<b>UNTREATED</b>	\$10.25	\$10.45	\$10.70

## Balansa Clover

- + An annual legume that will reseed for future years.
- + Sown with Italians for finishing lambs or sown under Brassicas to boost the diet variation.
- + Tolerates heavy soils.
- + Normally planted Autumn

	25kg +	10 – 25kg	up to 10kg
<b>UNTREATED</b>	\$10.20	\$10.45	\$10.65
<b>D NASTRIKE</b>	\$13.20	\$13.45	\$13.65
<b>GOLD STRIKE</b>	\$15.70	\$15.95	\$16.15

all prices include freight & exclude gst

**Other varieties of Clovers available on request**

## OTHER CLOVERS

### Berseem Clover

- + Erect annual clover with short tap root.
- + Can withstand mid salinity.
- + Excellent growth and strong performer.
- + Recommended sowing rate 2–4 kgs per hectare in a mix.

	25kg +	10 – 25kg	up to 10kg
<b>UNTREATED</b>	\$10.20	\$10.35	\$10.55
<b>D /ASTRIKE</b>	\$13.20	\$13.35	\$13.55
<b>GOLD STRIKE</b>	\$15.70	\$15.85	\$16.05

all prices include freight & exclude gst

### Strawberry Clover

- + Large leaf that has longer and narrower leaves than white clover.
- + Produces a tap root and has a good spreading ability, perennial that performs on unreliable climates.
- + Recommended sowing rate 2–4 kgs per hectare in a mix.

	25kg +	10 – 25kg	up to 10kg
<b>UNTREATED</b>	\$11.30	\$11.55	\$11.75
<b>D /ASTRIKE</b>	\$14.30	\$14.55	\$14.75
<b>GOLD STRIKE</b>	\$16.80	\$16.95	\$17.25

all prices include freight & exclude gst

### Spinless Burr Medics

Contact Wesco for pricing details

- + A legume that can fix 200 kgs/n per year like higher ph. soils and have a good drought tolerance with good regeneration ability.

### Alsike Clover

Contact Wesco for pricing details

- + A bi-annual clover, some winter activity, very strong spring/summer growth.
- + Suits medium to high rain fall.

### Gland Clover

Contact Wesco for pricing details

- + An early flowering annual clover, suited to perennial or annual pastures, good winter activity.

## AberLasting Caucasian White Clover

The first Super Clover is here

AberLasting is the first ever super clover, developed to incorporate the benefits of Caucasian clover with white clover, giving farmers the best of both.

- + Stoliferous (surface and underground runners) and rhizomatous (larger and deeper underground stem) root system.
- + Increased persistence from rhizomatous root system.
- + Faster establishment than Caucasian clover.
- + More drought tolerant than white clover - maintained leaf water content for one week longer than white clover when without water<sup>1</sup>.
- + Excellent cold tolerance.
- + Can withstand heavy grazing and recovers quicker than white clover.
- + Nitrogen fixation comparable with white clover.
- + Abe productio paddocks have seen tolerance to Clover Root Weevil over second and third years under pressure

## Crimson Clover

- + Soft seeded, deep rooted annual clover.
- + Up right growth habit.
- + Quick establishment, ideal for short term rotations, sow in Autumn or Spring.
- + Little bloat risk.
- + Prefers well drained soil.
- + Will regrow if grazed no lower than 8cm before bud stage.
- + Allow flowering and seed setting in first year for regeneration.

## Alsike Clover

- + Moderate winter activity - highly active early Spring.
- + Best suited to cool temperature, medium to high rain fall areas.
- + Very high frost tolerance, but poor drought and heat tolerance.
- + Best suited for rotational grazing or hay production.

## CHICORY

### Sargent Chicory

- + Stock health benefits.
- + Deep tap root to enhance nutrient recovery.
- + Excellent stock fattening qualities.
- + First graze when Chicory is 15 to 20cm height so taproot is well established and resists pulling.
- + Grows erect as a wonderful milking feed with great active summer growth.
- + Suits free draining soils.
- + High Magnesium, Calcium and Copper levels.
- + Creates an excellent mix with plantain.
- + Recommended sowing rate:
  - 2–4 kg in a mix
  - 6–10 kg on its own

	25kg +	10 – 25kg	up to 10kg
UNTREATED	\$19.00	\$19.50	\$20.50

**Other varieties of Plantain available on request**

# Wesco Ley Blend

Contact Wesco for pricing details

**Wesco Ley Blend is blended for each individual farmers needs and we strive to incorporate a minimum of 8 different types or varieties of seed to formulate a more nutritious array off herbage for the class of stock that graze it.**

A wide variety of herbage helps to contribute to a more nutrient dense feed that will help keep your stock in better health and helps to improve productivity. Farmers tell us the end use for their blend and we work with them on formulating and mixing to their requirements bringing a more holistic and balanced approach to the sward that they plant.

As you will notice the results and yield from this formulated Wesco Ley Blend to the customer's needs have been quite mind blowing and outstanding.

## CUSTOMER COMMENTS:

*"We cut 18,000kgs of dry matter per ha in 135 days"*

*- Waikato farmer JG*

*"Our goats went up a litre of milk per day when-  
ever I added the Wesco Ley into the goat's diet; it  
is in there forever now"*

LUCERNE

# Velvet Lucerne

- + Thrives best in free draining soil. Loves soils with high calcium availability.
- + Velvet Lucerne makes the most palatable hay with easily digestible stalks.
- + Winter dormant which means it bolts more during the growing season.
- + The more winter dormant the more disease resistant.

- + Recommended sowing rate of approximately 12–16kg per hectare.
- + Long lasting (around 6 years and over).
- + Good protein source.
- + Great summer dry forage.

	25kg +	10 – 25kg	up to 10kg
<b>UNTREATED</b>	\$15.50	\$16.00	\$17.00

## 54v09

*Contact Wesco for pricing details*

- + Winter dormant with excellent winter hardiness.
- + Grazing or supplement high pest resistance to some pests.
- + Recommended sowing rate of 12–16kg per hectare.

Check out  
our Slug Bait  
on page 69!

## Runner 11

*Contact Wesco for pricing details*

- + Good disease tolerance with good establishment has the ability to put out runners to help keep stand persistence.
- + Is winter dormant rating 2.
- + Recommended sowing rate of 12–16kg per hectare.

## Force 4

*Contact Wesco for pricing details*

- + Multiple stem variety with upright growth and a high leaf to stem ratio.
- + Winter active rating 4.
- + Good in cutting and grazing systems.
- + Good disease and pest tolerance.

## Kaituna

*Contact Wesco for pricing details*

- + Fine stemmed Lucerne.
- + Semi winter dormant.
- + High dry matter production.

# Wesco Liquid Fertiliser

Increase Production with Biological and Sustainable Agriculture

## Wesco Supa NS Liquid NPK Plant Growth Manipulator

Wesco Supa NS is a Nitrogen based liquid fertilizer complemented with higher sulphur levels, smart technology stabilizers for nitrogen and supporting macro elements in trace quantities to give you a better longer lasting N response.

Supa NS has started to build on the benefits of foliar application of Nitrogen and has taken the combination approach to a whole new level in the field.

Being a combination of nutrients, with the major component being Nitrogen, Wesco Supa NS gives more balanced plant growth combined with extra sulphur and farmers have reported a sustained growth for twice the time of other nitrogen applications.

Wesco Supa NS has two forms of nitrogen, ammonia and nitrate nitrogen.

Gibberellic acid may be added to this product. Supa NS can help reduce the yellowing often shown with gibberellic acid applications.

Application rate 35–45L per hectare.

Recommended water rates minimum 100L per hectare and 200L being ideal.

Do a pot test before applying with chemicals and advise your agent.

Product available in 200L and 1000L pods

### CUSTOMER COMMENTS:

*"I've used a range of foliar fertilisers and Supa NS has given me the best results yet"*

Roger D, South Waikato

*"I've found that spoon feeding my grass with Supa NS over winter has given me better results than prilled urea"*

G.A, TeAwamutu

*"I love the formulation as it doesn't block my nozzles on the spray rig"*

I.M, Central Waikato

*"The grass looks greener than prilled urea and growth is sustained for longer"*

K.H, Bay of Plenty

*"I had growth for up to twice the length of time of urea ... Impressed"*

G.A, TeAwamutu

# Wesco Easy N for accelerated nitrogen stimulated growth

Easy N is a basic Nitrogen based liquid fertilizer comparable with other products on the market containing smart technology stabilizers for the nitrogen, aiding longer N response when applied.

N is a major component to all cells in all living things. Often a lack of it can be a limiting factor for growth.

Easy N is used when growers and farmers would like to accelerate growth of there crops and pasture with a basic 'N' application, but would like a more sustained growth .

Gibberellic acid may be added to this product, but we regard SupaN5 as a better combination.

Application rate is 35–50 litres per hectare.

If the conditions are dry then a lesser rate is recommended due to the burn factor that can occur. Water rates are determined by the method of spraying with 100 litres being the minimum and 200 litres being ideal.

# Guide to Planting Wesco Seed for Success

## POINTS TO REMEMBER WHEN SOWING;

- + Please ensure your seed is planted at the correct depth as this is critical to plant survival.
- + Plant seed at correct depth, no more than 15mm. If White Clover seed is planted more than 10mm deep there is a possibility germination rate may be reduced down to 50%.
- + As a rule of thumb, if the soil is dry, plant seed deeper to be in a more moist zone of the soil. If soil is wet plant seed closer to the surface .
- + Calibrate drill for each paddock and CHECK how deep the seed is going, adjust accordingly, **if using a contractor check what is happening** as this seed is the future of your farm!
- + Record all conditions, soil moisture, drill settings, ground temperature and weather after planting to establish your own personal farm guide.
- + The seed embryo is small and has limited energy so you need to place seed so it can get out off the ground as quick as possible.
- + If in doubt about the growing conditions Dynastrike will greatly accelerate your germination rate, a small investment for fantastic results.
- + Always promote optimum strike rate and plant health by using Dynastrike on seed, for results that you can see!
- + Check that your soil has good fertility and the pH levels are correct for the species you are sowing, which will ensure good plant growth! Have a soil test done regularly and correct any imbalances.
- + If there are soil deficiencies, you need to fertilize/feed/condition the soil prior to planting, and/or check if it is necessary to feed the young plants when they are establishing.
- + Make sure your over/undersowing /application or drilling technique is relevant to the season and seed species you are planting and compatible with the conditions/soil type of the field.
- + Wesco Seeds Ltd is not responsible in any shape or form for poor farm management practice consequently affecting the performance of Wesco seed or products.
- + For optimum farm productions and results, seek professional independent advice from a qualified Agronomist that can assist you with farm health and management.
- + Always make sure your seed bed is firm, if it is fluffy roll it again before sowing. It is ideal to keep the seed bed rolled between cultivation passes to help retain moisture and prevent organic matter loss. If you are getting a wave in front of your roller stop sowing and roll the paddock again. Have you ever asked why the seed seems to get established faster on the head lands or where the tractor has driven? .. maybe it is a firmer seed bed.

# Ordering, Delivery & Freight

Ordering Wesco Seeds is as easy as:

- A phone call - 0800 643 643
- Email - sales@wesco.co.nz
- Via our website - www.wesco.co.nz
- Order form included in the centre of this catalogue

+ We invoice and deliver your Order direct to your farm, or directed location of your choice.

+ Your Wesco Seed and Farm Product order is normally dispatched the morning after you place your order. Please allow 2-5 working days for delivery.

+ Virtually all Wesco Seed is supplied in 25KG bags. Bulk bags are also an option.
